EDUCATION

Hatyai Technical College

- Computer and Network Technology
2018–2020
- Electronics Technology
2015–2018

WORK EXPERIENCE

Web developer

Zchoolmate Co., Ltd. & Loremboard Co., Ltd.

Permanent, Aug 2023 – Oct 2024

- Developed user-centric front-end solutions utilizing Angular, React, and Next.js, focusing on responsive design and seamless UX/UI customization.
- Implemented microservices and data-fetching functions while debugging and testing applications.
- Designed and maintained robust back-end systems with CRUD REST APIs, ensuring secure authentication and authorization using JWT.
- Managed database migrations and integrations across MongoDB, MySQL, Firebase, and PostgreSQL, optimizing data flow and storage solutions.
- Utilized Git for version control, collaborating effectively within a team to manage code changes and track project progress.

Web developer

CO2 Innovation Co., Ltd.

Contract, Mar 2024 – Jun 2024

- Developed CO2 Asset Management, a land management website, handling the entire process from gathering user requirements to deployment.
- Designed the user interface and database, implemented CRUD REST APIs, and ensured secure authentication and authorization.
- Created microservices for data retrieval from both backend systems and third-party sources, managing files and solving user-reported issues.
- Utilized React (TypeScript), Nest.js (SQL), and phpMyAdmin, with Git for version control, to build and maintain the project.

RELEVANT SKILLS

- React (TypeScript) – expertise in Component, Hooks, Context API, Router, and implementing dynamic UIs.
- Angular (TypeScript) & Angular Ionic – understanding of Component, Module, Service, RXJS, Routing, Directives, and Form Builder.
- Nest.js (TypeScript) – skilled in building REST APIs, managing authentication (JWT), and database migrations with SQL and TypeORM.
- HTML, CSS, SCSS – proficient in building responsive UIs, following designs from tools like Figma.
- Git – version control, collaborating in teams, managing branches, and tracking code changes.
- MongoDB, MySQL, phpMyAdmin, PostgreSQL, Firebase – experience in database design, CRUD operations, and migrations.
- Java Spring Boot – basic experience in authentication, authorization (JWT), and CRUD REST APIs, developed through a demo project.
